

## 2022 Warning

Cap continued. "Now that we have made the case for 2029, 2025, 2024 and 2023, we are in a position to better understand the forces at work in the prior years."

Cap took a sip of water and answered a couple questions. Then she returned to the subject of Malachi Martin.

Speaking about the Great Sign, Martin wrote in that same section of *Keys of This Blood* that John Paul II "does know some of the horrific details of that worldwide catastrophe. He knows also that it will not come without prior warning, but that only those already renewed in heart - and that would probably be a minority - will recognize it for what it is and make preparations for the tribulations that will follow."

"There is the word we have been looking for: 'Warning.'"

The four operative words here are Catastrophe, Warning, Preparation and Tribulations. Spoken by a man who ought to know because he had the rare privilege of reading the Third Secret and he has a close relationship with others who had read the Secret and read the notebooks. Martin had kept the Secret and he was trusted.

These ideas could be deduced from other prophecies elsewhere. Martin neatly puts them in one place. Let's look at these words one at a time:

**Catastrophe.** According to Martin, John Paul believed that the Great Sign in the sky will also have a catastrophic effect here on earth. The aurorae will be much more than a colorful display in the sky. It will be destructive.

**Warning.** Warning for the renewed in heart will precede the catastrophe.

**Preparation.** There will be time to make preparations.

**Tribulations.** Martin wrote a book about exorcisms. He knew trouble when he saw it in a way that few people do. The catastrophe will be followed by the tribulations. So, the order of events will be some process of Warning, then a time to make preparations, then the Catastrophe, and then the Tribulations.

## *Preparations*

Martin chose his words carefully. He said a minority 'will recognize it for what it is and make preparations for the tribulations that will follow.

The 'it' that Martin refers to could be the circumstances leading up to the Great Sign or the Great sign itself. In the first case, the time to prepare would be the time before the catastrophe. In the latter, it would be the time after the catastrophe and before the tribulations. I favor the earlier of the two. After the catastrophe, time will be short and it will be too late.

God gave Joseph and the Pharaoh seven years to prepare for the famine. Seven is a mystical number. And seven years were needed to gather seven years of food. It is reasonable to suppose that God will again give seven years to prepare. And if the time of preparation is seven years, then seven years before 2025 would be the year 2018. The hundredth anniversary of Fatima was 2017. 2018 is the first year of the post Fatima period.

As time goes by, I believe we will see growing signs that it is time to prepare. Later, food will be expensive. The government will be bankrupt and there will be high unemployment.

"Now is a good time to prepare." With that Cap ended her lecture.

A few days later, Cap entered the office with Richard Wolfe, a professor of astronomy. Wolfe was aware of Cap's ideas and was sympathetic to her view that great celestial events were on the horizon.

Cap handed a paper to Wolfe. One of Cap's students had written an independent study paper about Planet X. She said "Maybe this is the culprit which is the cause of our troubles." It read:

### *The Discovery of Planet X, Nemesis.*

Planet X was discovered and photographed by JPL's deep space Infrared Electronic Telescope. The year was 1981. At that time the astronomers and scientists working on the project released the news of its discovery to the public news media. The story of its discovery was published in the New York Times and the Washington Post in 1981, then picked up by other newspapers and carried all over the world.

### *Dark Planet.*

It is believed that Planet X is a huge dark body much larger than the earth. It has an elliptical orbit like that of a comet. Its orbit is so elongated that it spends most of its time

in the darkness of outer space, but comes back into the inner solar system flying past the earth and the other planets every 3,600 years.

### Nemesis

Planet X may be a small star in which case it has an electro-magnetic field. It acts similar to a powerful magnet in space, pushing debris out in front of it as it advances through space and trailing a long tail of space debris behind it.

Inbound. Planet X, Nemesis, will cause great earthquakes, volcanic eruptions, and geological changes. This is what was recorded by the ancient Sumerians as happening the last time Nemesis traveled through the solar system some 3,600 years ago. One can speculate that Nemesis caused the plagues of Moses. And before that the flood of Noah. And before that the extinction of the woolly mammoths.

### The Great Coverup

It was decided that in order to avoid a worldwide panic resulting in the collapse of the world economy, a blanket of secrecy should be imposed.

Only one world leader has explained why the approach of Nemesis has not been revealed. That person is John Paul II. And he did so in an indirect manner. While speaking in Fulda, Germany in 1980 to a group of intellectuals, John Paul II responded to questions about the Third Secret. He admitted that Lucia's text does speak of chastisements. In response to another question, he stated that "the chastisements cannot be averted, it is too late." He stated that "the die was cast. [The chastisements] can be mitigated by praying the rosary... On the other hand, it should be sufficient for all Christians to know this: if there is a message in which it is written that the Oceans will flood whole areas of the earth and that from one moment to the next millions of people will perish, truly the publication of such a message is no longer something to be so much desired... if one is convinced that we can do nothing against a catastrophe that has been predicted...." So, John Paul was saying that the Vatican had decided not to reveal the Secret because the catastrophe is unavoidable.

One can wonder if there is any connection between John Paul II's having spoken indirectly of the comet and his having been shot several months later. Thereafter, he did not speak of the comet.

### *Underground Structures*

After 1981, the military, the elite and the governments of the world's leading industrial nations began building a vast complex of underground structures. The intention was to stockpile reserves of food and rebuilding supplies.

Recently, there was a break in the wall of secrecy. Catherine Austin Fitts appeared on the Greg Hunter program and said that astronomers had discovered something in space which threatened life on our planet. Something that could cause a Noah like event. That the military was in a rush to build underground facilities. And that they are connected by a vast network of tunnels. The tunnel reference was edited out in the first twenty-four hours. She had said too much. But, in the newer edited version, the interviewer added that there were hundreds of thousands of miles of high-speed tunnels. Hundreds of thousands of miles. Fitts said that the US has been doing a lot of infrastructure but it is underground.

Fitts asked "what is the rush?" Which was her way of speaking about a subject which is not supposed to be spoken about. Fitts was saying in veiled language that they are indeed in a rush. And that the encounter is imminent.

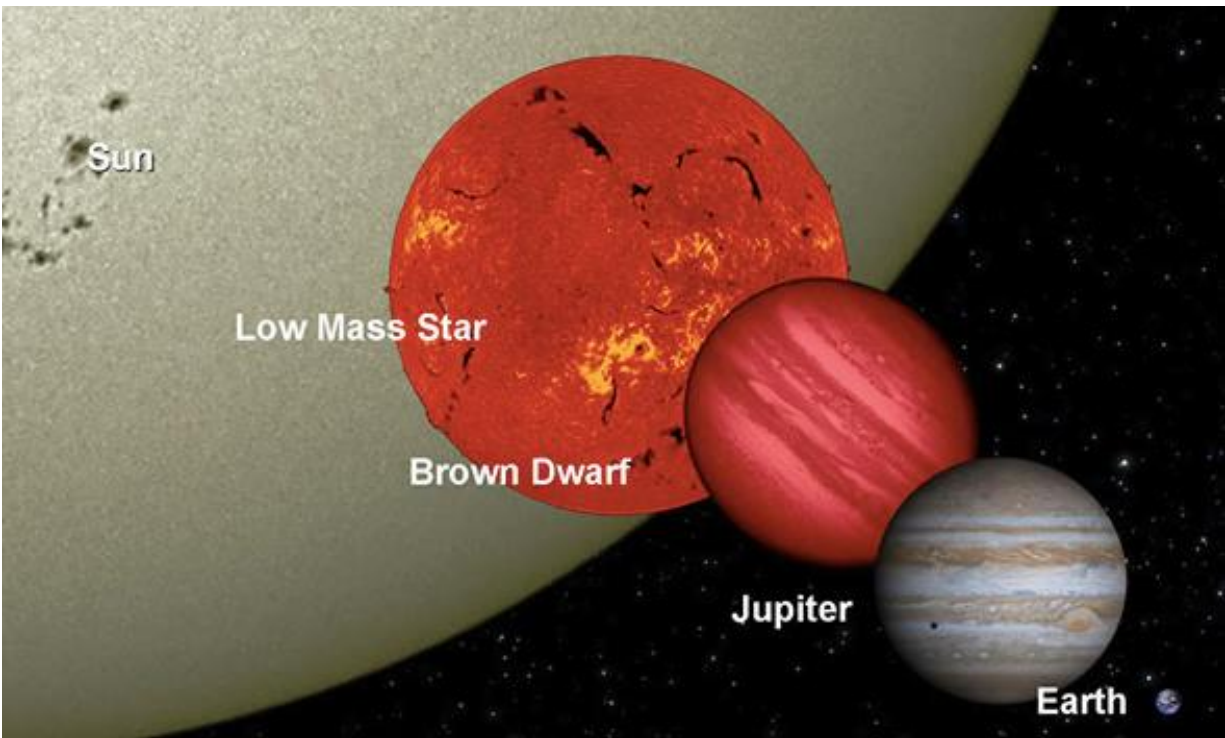

A reasonable conjecture can be made that as the comet gets closer it will cause more trouble in our weather. More volcanos, more hurricanes, and more earthquakes.

### *Low Mass Star*

Below is a side by side size comparison of our Sun, a low mass star, a brown dwarf, Jupiter, and Earth. “Stars with less mass than the Sun are smaller and cooler, and hence much fainter in visible light. Low Mass Stars have less than ten percent of the mass of the Sun, which is not enough to sustain the fusion reaction that keeps the Sun hot. These orbs are nearly impossible to see in visible light, but stand out when viewed in infrared. Which is why the Vatican participates in an infrared telescope in Arizona.

Their diameters are half again as large as Jupiter's, but they can have up to 80 times more mass and are thought to have planetary systems of their own.”<sup>i</sup> Image credit: NASA.

It is reasonable to conclude that a long train of rocky debris will follow it for many

years. End of paper.

Cap looked at Wolfe. He said he found it very interesting.

### *Queen of the South*

Cap said that she had an idea which she would like to run by him. “I have been thinking about the expression ‘Queen of the South.’ It occurs in Scripture. Jesus said ‘The Queen of the South

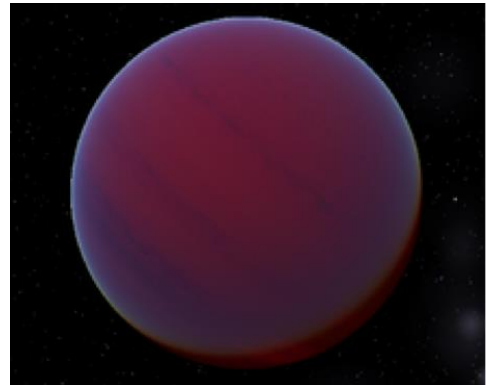

will rise up in Judgement against the men of this generation, and condemn them because she came from the ends of the earth to hear the wisdom of Solomon; and behold more than Solomon is here. ' I think this passage is a cloaked reference to a comet.

Wolf nodded to indicate that he was considering a new idea. Cap continued. "We know that the comet is associated with the queen of heaven. And that it is coming from the south. So 'rising up' has a dual meaning. It is rising up as in traveling upward. And it is rising up in Judgement.

### *Radiant Star*

The transcriptions of Julia Jahenny shed some light on this. She said that a radiant star would be led out of exile in a frightful storm of fire and anger. Could you call a small star a radiant star?

Wolf answered that a radiant star, like a radiant heater, meant reddish and hot but not flaming. He added that "a radiant star led out of exile' is an poetic way of describing a small mass star on a long cometary path. If it passes through our neighborhood, it could be described as a frightful storm"

### *Magenta*

Wolfe looked at the research assistant's paper. "If the Queen of the South is a radiant star, from what I have gathered from you, it will come as a thief in the night. It may have a heavy cloud cover. Some radiant stars have an atmosphere of iron rain.

You said that Jahenny said the three days darkness will be intensely hot. That implies the it will be further up the scale in heat and size. It will be magenta or red orange. But please go on."

### *Generation*

Cap continued. "Then, there is also the word Generation. The word generation expresses a two-thousand-year period. It expresses the whole development of mankind in the last 2000 years.

### *She came from the ends of the earth*

The ends of the earth would include the most distant places which feel the faint tug of the sun. And the most distant place from which she came back. At that most distant place, she paused in her travels and turned back. Maybe she started back when the Queen of Sheba visited Solomon.

The Queen of the South section might be paraphrased as follows: A comet is coming. It comes from far way in the south. It will travel northward through our solar plane. We may call this comet 'The Queen of the South.' When it arrives, our society will be judged and condemned. Our planet will be shaken. The crises which follow our encounter with the comet will serve as a punishment. The star bears witness that more than the wisdom of Solomon has been present to mankind and not been honored.

Wolfe wondered about the process of naming a comet the Queen of the South.
