

## Introduction

This is an account of the experience of a fictional character named Catherine Patricia O'Brien, a professor of history at St Louis University. However, most of the material is factual. Catherine carefully reconstructed what had become known as the Third Secret of Fatima. She published her theory in a book, titled *Third Secret Composite*, which is available for reading at [thirdsecret.net](http://thirdsecret.net).

Fatima had been a big issue in 1960 when the whole world awaited the opening of the envelope which held the Third Secret of Fatima. The words of the Secret had been spoken by the Our Lady in 1917 to Lucy of Fatima. There was widespread disappointment when the Secret was not revealed in 1960. In the sixty years that followed, the Third Secret had been largely forgotten.

Now that her book had become available, Catherine turned her attention to the future. Cap, as she was known to her friends, wanted to construct a plausible timeline of what was likely to happen in the next two decades based on an abundance of Fatima material. She had a lot of material left over which neatly fitted together. From this, Cap assembled what she called a Most Likely Scenario.

### *Three significant dates*

In the Fatima apparitions, there are three significant dates. 1917, 1925 and 1929. The year 1917 was the year of the six apparitions of Our Lady to the three shepherd children in Fatima Portugal. 1925 was the year in which Our Lady appeared to Lucy to request the Five First Saturdays of Reparation. And 1929 was the year in which Our Lady requested the Consecration of Russia.<sup>i</sup>

Cap wrote a letter to a friend:

### *Something Approaching Us*

Let me propose that there is something out there in space which is approaching us. Pope Benedict made Hildegard a doctor of the Church. Hildegard wrote about a comet.

Malachi Martin was a writer and priest who had read the Third Secret. He told Art Bell on Bell's radio program that there is something approaching us. It happened like this. Art Bell had a well-known late-night radio program called Coast to Coast Radio.

Bell liked Malachi Martin and had him on his program a number of times. In 1997, Bell asked why the Vatican had "muscle" its way into an observatory on Mt Graham Arizona in order to look at things in deep space. Martin answered that the highest level of the Vatican knew that there was something approaching us from deep space. Bell complimented Martin on his carefully chosen words. Which means that Martin knew that something was approaching us, and the Vatican knew that something is approaching us and even Bell knew that something is approaching us.

### *More than an Asteroid*

"I would venture an educated guess that the approaching entity is more than an asteroid. It is more than a planet. It is a small star. The mystic, Julia Jahenny, called it a radiant star.
