

2023 Thunder, Lightning and Voices

Cap continued her presentation. "This brings us to 2023. We are going a little bit out on a limb to make a prediction about 2023. The prediction is this. There will be a great storm. In the words of the Apocalypse, it will be a storm such as men have never seen since men have been on earth.

To look back for a moment. The case for 2029 is strong. In speaking to Lucy, Jesus almost makes the case for a civil war in Europe in 2029. The case for the Great Sign in 2025 is extrapolated from 2029. It is a good proposition. The case for the earthquake in 2024 is extrapolated from 2025. The proposition is not as strong but it is reasonable. The case for 2023 is extrapolated from 2024. Here we are walking on thin ice. Except that, Chapter eight of the Apocalypse comes to our rescue.

End of the Silence

Lucy said that part of the Third Secret can be found in Chapter Eight. In Chapter Eight, the Seventh Seal is opened. And there is silence in heaven for a half an hour. Half an hour has often been thought to mean fifty years. The Silence could be thought of as having begun with the apparitions of Akita on October 13, 1973. After Akita, the number of real apparitions fell off a cliff. Fifty years brings us to 2023. And after fifty years, the silence will explode with thunder and storm and voices such as men have never before heard.

We may expect Thunder, Voices and Lightning in 2023. If the timing is kept to a tight time schedule, then the Thunder and Lightning will cascade on October 13, 2023.

2022

Will anything happen in 2022? Let us look again at Chapter Eight, after a silence in heaven, the angel offers incense and then casts the coals of his censer upon the world. After that, comes the Thunder and Lightning. The coals falling from the sky would constitute a meteor shower. The shower would precede the storm. It may happen immediately before the storm or it may happen a year before. But, for sure, if we have meteor showers in 2022, you can expect the rest of the scenario to follow.
